## **Portable Two Way Radio**

### **A72**

# **User Manual**

# Welcome!

Congratulations on your purchase of our instant communication equipment. Our products will provide you with high quality, clear voice, reliable and easy to use bidirectional person-to-person voice communication for your safety and improving efficiency.

Our products will keep you in constant touch with your team members for years to come with negligible maintenance down-time.

Please take a few minutes to read this manual carefully. The information presented here will allow you to derive maximum performance from your radio, in case questions arise later on.

# SAFETY AND GENERAL INFORMATION

Important Information on Safe and Efficient Operation, Read This Information Before Using Your Radio.

The information provided in this document supersedes the general safety information contained in user guides published before.

## **Transmit and Receive Procedure**

Your two-way radio contains a transmitter and a receiver .To control your exposure and ensures compliance with the occupational/controlled environment exposure limits, always adhere to the following procedure:

- ◆ Transmit no more than 50% of the time,
- ◆ To transmit, please press the Push to Talk (PTT) button.
- ◆ To receive calls, release the PTT button.

Transmitting 50% of the time, or less, is important because the radio generates measurable RF energy exposure only when transmitting (in terms of measuring standards compliance) .

## **Portable Radio Operation and EME Exposure**

### **Antenna Care**

Use only the supplied or the approved antenna for replacement. **DO NOT** hold the antenna when the radio is "IN USE". Holding the antenna affects the effective range.

### **Two-Way Radio Operation**

When using your radio as a traditional two way radio, hold the radio in a vertical position with the microphone 1 to 2 inches (2.5 to 5 cm) away from the lips.

### **Body-Worn Operation**

If you wear a radio on your body when transmitting, always place the radio in our supplied or approved clip, holder, holster, case, or body harness for this product.

If you do not use our supplied or approved body-worn accessories, and are not using the radio held in the normal use position, ensure the radio and its antenna are at least 1 inch (2.5 cm) from your body when transmitting.

### **Data Operation**

If applicable, when using any data feature of the radio with or without an accessory cable, position the radio and its antenna at least 1 inch (2.5cm) from the body.

### **Electromagnetic interference/Compatibility**

**NOTE:**Nearly every electronic device is susceptible to electromagnetic interference (EM) if inadequately shielded, designed, or otherwise configured for electromagnetic compatibility.

## **Facilities**

To avoid electromagnetic interference and /or compatibility conflicts, turn off your radio in any facility where posted notices instruct you to do so. Hospitals or health care facilities may be using equipment that is sensitive to external RF energy.

## **Aircraft**

When instructed to do so, turn off your radio when on board an aircraft .Any use of a radio must be in accordance with applicable regulations per airline crew instructions.

## **Medical Devices**

### **Pacemakers**

The Advanced Medical Technology Association recommends that a minimum separation of 6 inches (15 cm) be maintained between a handheld wireless radio and pacemaker .These recommendations are consistent with the independent research by and recommendations of the U.S. Food and Drug Administration.

### **Persons with pacemakers should:**

- ◆ **ALWAYS** keep the radio more than six inches (15cm) from their pacemaker when the radio is turned ON.
- ◆ Not carry the radio in the breast pocket.
- ◆ Use the ear opposite the pacemaker to minimize the potentiality for interference.
- ◆ Turn the radio OFF immediately if you have any reason to suspect that interference is

taking place.

### **Hearing Aids**

Some digital wireless radios may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

### **Other Medical Devices**

If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from RF energy. Your physician may be able to assist you in obtaining this information.

### **Safety and General Use While Driving**

Check the laws and regulations on the use of radios in the area where you drive. Always obey them. When using your radio while driving, please:

- ◆ Give full attention to driving and to the road,
- ◆ Use hands-free operation, if available.
- ◆ Pull off the road and park before making or answering a call if driving conditions so required.

## Operational Warnings

### Warnings

#### ◆ For Vehicles with an Air Bag

Do not place a portable radio in the area over an air bag or in the air bag deployment area. Air bags inflate with great forces. If a portable radio is placed in the air bag deployment area and the air bag inflates, the radio may be propelled with great force and cause serious injury to occupants of the vehicle.

#### ◆ Potentially Explosive Atmospheres

Turn off your radio prior to entering any area with a potentially explosive atmosphere, unless it is a radio type especially qualified for use in such areas as “Intrinsically Safe”. Do not remove, install, or charge batteries in such areas. Sparks in a potentially explosive atmosphere can cause an explosion or fire resulting in bodily injury or even death.

Note: The areas with potentially explosive atmosphere referred above include fueling areas such as below decks on boats, fuel or chemical transfer or storage facilities, areas where the air contains chemicals or particles, such as grain, dust or metal powders, and any other area where you would normally be advised to turn off your vehicle engine. Areas with potentially explosive atmosphere are often but not always posted.

#### ◆ Blasting caps and Areas

To avoid possible interference with blasting operations, turn off your radio when you are near electrical blasting caps, in a blasting area, or in area posted;”Turn off two-way radio. Obey all signs and instructions.

## **Operational Cautions**

### **Antenna**

Do not use any portable radio that has a damaged antenna. If a damaged antenna comes into contact with your skin, a minor burn can result.

### **Batteries**

All batteries can cause property damage and/or bodily injury such as burns if a conductive material such as jewelry, keys, or beaded chains touches exposed terminals. The conductive material may complete an electrical circle (short circuit) and become quite hot. Exercise care in handling any charge battery, particularly when placing it inside a pocket, purse, or other container with meal objects.

### **Battery Charger Safety Instructions**

1. Do not expose the charger to rain or snow.
2. Do not operate or disassemble the charger if it has received a sharp blow, or has been dropped or damage in any way.
3. Never after the AC cord or plug provide with the unit .If the plug will not fit the outlet, have the proper outlet installed by a qualified electrician. An improper condition can result in a risk of electric shock.
4. To reduce the risk of damage to the cord or plug, pull the plug rather than the cord when disconnecting the charger from the AC receptacle.
5. To reduce the risk of electric shock, unplug the charger from the outlet before attempting any maintenance or cleaning.

6. Use of an attachment not recommended or sold by us may result in a risk of fire, electric shock ,or personal injury.
7. Make sure the cord is located so it will not be stepped on, tripped over ,or subjected to damage or stress.
8. An extension cord should not be used unless absolutely necessary. Use of an improper extension cord could result in a risk of fire and /or electric shock. If an extension cord must be used, make sure that:
  - ◆ The pins on the plug of the extension cord are the same number, size, and shape as those on the plug of the charger.
  - ◆ The extension cord is properly wired and in good electrical condition.
9. The supply cord of this charger can not be replaced.

# UNPACKING AND CHECKING EQUIPMENT

Carefully unpack the radio. We recommend that you identify the items listed in the following table before discarding the packing material. If any items are missing or have been damaged during shipment, file a claim with the carrier immediately.

## Accessories List

Antenna

Li-ion Battery

Belt Clip

Charger

Adapter

User Manual

## PREPARATION

### Charging the Battery Pack

1. Place the charger on a flat surface.
2. Insert the plug of the power cord into the jack on the charger.
3. Plug the cord into an AC outlet.
4. Insert the radio which with battery installed (Make sure turn the radio off before charging.) or individual battery pack into the charging slot.
5. It takes around 5 hours to charge till the battery is fully charged.

**Note:** Please charge the battery only with the approved charger, power supply, charging cable ect.. Initially charging the battery pack after purchase or extended storage (greater than 2 months) will not bring the battery pack to its normal operating capacity. After repeating the charge/discharge cycle two or three times, the operating capacity will increase to normal level.

### Installing/Removing the Battery Pack

1. Align the convex part on the top of the battery with the groove of the chassis and insert it, then press the bottom of the battery and lift up the battery latch and press to fasten it.
2. Turn off the power, pull the battery latch outward and then remove the battery pack.

### Installing/Removing the Antenna

1. Put the antenna on the connector and rotate the antenna clockwise till hand tight.
2. Rotate the antenna counter clockwise till you can remove it.

### **Attaching/Removing the Belt Clip**

- 1.Align the rails on the belt clip with the grooves on the battery, then press the belt clip downwards into place.
- 2.To remove the belt clip, hook the clip latch upwards and then push the belt clip forward out of the slide groove to remove the belt clip.

### **Attaching/Removing the Optional Accessory**

- 1.Open(no remove) the accessory jack cover, then plug the accessory firmly into the jack.
- 2.To remove, pull the accessory and put the cover back in right position.

# GETTING ACQUAINTED

## Orientation

## Display Screen Guide

No.	Icon	Explanation

11		Scrambler
12		Comandor
13		Positive (+) or Negative (-) Offset Direction
14	<b>D</b>	DTMF
	<b>T</b>	2-Tone
15	<b>400.50000</b>	Frequency/Channel Name/Menu
16		Standby for Signal
17		A or B Working Band
18		 :Low Power
		 :High Power
19	VFO/001	VFO mode or Numbers of Channels in MR/CH/NM Mode
20	<b>VOL.</b> 	Receiving Voice
21		Main Working Band
22	<b>MENU</b>	Menu Access or Confirmation of Selection
23		Up and Down
24	<b>MODE</b>	Change Working Mode or Exit/Return Previous Menu

**Note:** When in the menu system, it will automatically exit the menu after 10s of no operation.

## Working Band

There are two main working bands, choose the correct working band is essential in order to operate smoothly.

### ■ Change Main Working Band

In standby mode, press [#] key to change Band A and Band B.

- **MAIN** will appear on LCD display and show you the current main working band.

### ■ Change Working Mode

In standby mode, press [☰] key circularly to change between VFO,MR,CH mode.

136.00000 VFO

VFO mode

400.00000 001

MR mode

CH-001 001

CH mode

### ■ Dual Work

In order to dual display A & B band and monitor dual frequency or channels, you can turn on this function.

1. In standby mode, press [☰] key to access menu system.
2. Use [^]/[v] key to select “**System Config**” and press [☰] key to access sub menu system.
3. Use [^]/[v] key again to select “**14 Double Work**” and press [☰] key to access setting mode.
4. Use [^]/[v] key to select “**Close**” or “**Open**” and press [☰] key to confirm your selection.
5. Press [PTT] button to exit the menu setting mode.

## Keypad Description

Key	What You Operate
[↵]	1)In standby mode, press [↵] key to access menu system. 2)In menu system, press [↵] key to confirm your selection.
[⇐]	1)In standby mode, press [⇐] key to change the radio working mode between VFO and MR/CH/NM modes. 2)In menu system, press [⇐] key to exit the current menu and return to the superior menu until exiting the menu system.
[^]	In standby mode, press [^] key to select an operating channel, menu value or others.
[v]	In standby mode, press [v] key to select an operating channel, menu value or others.
[*]	1)In standby mode, press and hold [*] key for 3 seconds to lock or unlock the keypad. 2)In " <b>Channel Set</b> " menu, when select CTCSS/DCS, press [*] key to toggle between CTCSS tone, DCS normal code and DCS inverted code. 3)When turn on "Call Tone" function, in standby mode, press [*] key to transmit a call.
[#]	In standby mode, press [#] key to change main working band.
[0]-[9]	In standby mode, press the corresponding number key to input frequencies or memory channel number.

## Programmable Auxiliary Functions

Your dealer may program the [**Top Key**] or [**Side Key**] (long press or short press) with one of the following auxiliary functions respectively.

No.	Function	No.	Function
1	Off	9	Battery Electric Power Display
2	Squelch Off	10	Emergency Alarm
3	*Squelch Off Momentary	11	Annunciation CH No.
4	Vox	12	Channel Group Switch
5	Adjust Power Level	13	Scramble Frequency
6	Scan	14	1750Hz
7	Roger	15	Dial List
8	Screen Display		

### Note:

- You can set the time of pressing long key from 0.3-10 seconds(default: 2 seconds) with programming software, when you press anyone of [**Top Key**] or [**Side Key**], the time of pressing is over your setting time, then it's a long time key, otherwise, it's a short key.
- For marked item with (\*), this function is only to be programmed when it's a long key.

## BASIC OPERATIONS

### Turn the Power On or Off

Turn the [**Power/Volume Knob**] clockwise to turn the radio ON.

- *The display screen then shows the current channels, code and all features that are enabled. The radio is now in two-way mode.*

Turn the [**Power/Volume Knob**] counter clockwise to turn the radio OFF.

### Adjusting the Volume

Rotate the [**Power/Volume Knob**] to adjust the volume.

Clockwise increases the volume and counter clockwise decreases it. You may need to adjust the volume more precisely while communicating with other parties.

- *Do not hold the radio close to your ear. If the volume is set to an uncomfortable level, it could hurt your ear.*

### Selecting a Channel

Rotate the [**Tuning Control**] or use [ $\wedge$ ]/[ $\vee$ ] key to select your desired channel.

- *When a non-programmed channel is selected, an alert tone sounds will be heard.*

## Transmitting

To communicate, all radios should be in the same channel/frequency and signaling & encryption (CTCSS tone, DCS code, AEC ect.).

- *An analog channel can't communicate with a digital channel.*

1. To talk, press and hold **[PTT]** button and speak

- *For best sound quality at the receiving station, hold the microphone approximately 1.5 inches (3~6 cm) from your mouth.*

2. Release the **[PTT]** button to standby.

## Receiving

Your dealer may have programmed CTCSS/DCS, Scrambler signaling ect. in your radio.

If your selected channel is programmed with one of these features, you will hear calls only when another party in your system transmits which has the same signaling with yours. All other calls will not be heard.

If your selected channel is not set up with a signaling type, you will hear calls made by any party (not just those in your system).

# MENU

## Menu Access

1. In standby mode, press [M] key to access menu system.

• The menu list appears.

2. Use [^]/[v] key to select the desired main menu.

3. Press [M] key to enter sub menu setting mode.

4. Then use [^]/[v] key again to select the desired sub menu number.

5. Press [M] key to enter setting mode.

6. Use [^]/[v] key to switch ON/OFF or select numeric values.

7. Press [M] key to complete the setting.

• You can press [M] key to turn back previous menu till exit menu system.

8. Press [PTT] button to exit menu system.

### Note:

In this manual, when you enter and use menu system to select, Please make sure the operation in 10 seconds after pressing [M] key. Otherwise, the radio will turn back to original working mode.

Main Menu	Sub Menu No.	Selectable	Explanation
Device Info	01 Radio Name	User 0-User 250	Edited by programming software.
	02 Device Info	Soft Version Program Time	This info is automatically recorded and generated by the programming software, it cannot be changed.
	03 Embedded Info	---	Assigned by programming software.
Channel Set	01 Power	Low Power High Power	Low Power: Less power consumption, but shorter call distance High Power: Longer call distance but higher power consumption
	02 Band Set	Narrow/Wide	Select narrow or wide band.
	03 VOX	Close/Open	Turn on or off VOX function.
	04 VOX Level	Close,1-10	1: the highest sensitivity level 9: the lowest sensitivity level

# TROUBLESHOOTING GUIDE

Phenomena	Analysis	Solution
You cannot turn on the radio.	The battery may be installed improperly.	Remove and reattach the battery.
	The battery power may run out or died.	Recharge or replace the battery.
	The battery may suffer from poor contact caused by dirty or damaged battery contacts.	Clean the battery contacts or replace the battery.
During receiving, the voice is weak or intermittent.	The battery voltage maybe low.	Recharge or replace the battery.
	The volume level may be low.	Increase the volume.
	The antenna maybe loose or maybe installed incorrectly.	Turnoff the radio, and then remove and reattach the antenna.
	The speaker maybe blocked.	Clean the surface of the speaker.
You cannot communicate with other group members.	The frequency or signaling type maybe inconsistent with that of other members.	Verify that your TX/RX frequency and signaling type are correct.
	You may be too far away from other members.	Move towards other members.
You hear unknown voices or noise.	You may be interrupted by radios using the same frequency.	Change the frequency, or adjust the squelch level.
	The radio in analog mode maybe set with no signaling.	Request your dealer to set signaling for the current channel to avoid interference.
You are unable to hear anyone because of too much noise and hiss.	You may be too far away from other members.	Move towards other members.
	You may be in an unfavorable position. For example, your communication may be blocked by high buildings or blocked in an underground area.	Move to an open and flat area, restart the radio, and try again.
	It may be the result of external disturbance (such as electromagnetic interference).	Stay away from equipment that may cause interference.
The radio keeps transmitting.	VOX may be turned on or the headset is not installed in place.	Turn off the VOX function. Check that the headphones are in place.

# EXCLUSIONS FROM WARRANTY COVERAGE

## **Normal Wear and Tear:**

Periodic maintenance, repair and replacement of products or accessories due to normal wear and tear.

## **Abuse & Misuse:**

Defects or damage that results from:

- a. improper operation, storage, misuse or abuse, accident or neglect, such as physical damage (cracks, scratches, etc.) to the surface of the products and accessories resulting from misuse;
- b. contact with liquid, water, rain, extreme humidity or heavy perspiration, sand, dirt or the like, extreme heat, or food;
- c. use of the products or accessories for commercial purposes or subjecting the product or accessory to abnormal usage of conditions;
- d. other acts which are not the fault of us.

## **Use of non our branded products and accessories:**

Defects or damage that result from the use of non our branded or certified products, accessories, software or other peripheral equipment.

## **Unauthorized Service or Modification:**

Defects or damages resulting from service, testing, adjustment, installation, maintenance, alteration, or modification in any way by someone other than us or our authorized party.

**Altered Products:**

Products or accessories with:

- a. serial numbers or date tags that have been removed, altered or obliterated;
- b. broken seals or that show evidence of tampering;
- c. mismatched board serial numbers;
- d. or nonconforming or non our branded housings, or parts.

**Communication Services:**

Defects, damages, or the failure of products or accessories due to any communication service or signal you may subscribe to or use with products or accessories.
